TANISHKA GUPTA

MERN Stack Developer
Bhopal, India | 6266509179 | tanishkagupta1123@gmail.com | Github | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

MERN Stack Developer with 1+ year of internship experience building scalable web applications and REST APIs. Experienced in JWT authentication, Redis caching, RAG pipelines, and integrating LLMs into full-stack applications.

EXPERIENCE

Frontend Development Intern **February 2025 – July 2025**

Cloud Pivot Technologies Pvt. Ltd.

- Developed reusable and responsive UI components using React.js, Tailwind CSS, HTML5, and CSS3.
- Integrated REST APIs using Axios to connect frontend components with backend services.
- Managed application state and handled API responses, loading states, and errors.
- Resolved UI bugs and improved cross-browser and mobile compatibility.

Full Stack Developer Intern **August 2025 – September 2026**

HPS Lab Designs Pvt. Ltd.

- Developed and maintained RESTful APIs using Node.js and Express.js for a smart mobility CRM platform.
- Implemented backend workflows for device mapping, memberships, subscription management, and fuel tracking.
- Managed MongoDB operations and integrated backend services to support CRM functionalities.
- Debugged API issues and enhanced existing backend functionality through iterative development.

PROJECTS

SmartRAG | AI-Powered Document Intelligence & RAG Platform

Tech Stack: *React.js, Node.js, Express.js, MongoDB, Redis, Qdrant, LangChain, Groq API*

- Built a RAG platform for PDF-based question answering using semantic search and LLMs.
- Implemented document processing, text chunking, Gemini embeddings, and vector search using Qdrant.
- Integrated Redis semantic caching to reduce redundant LLM calls for similar queries.
- Developed query routing with Auto, Documents, and General AI modes, along with JWT authentication

TaskForge | Distributed AI Job Queue System

Tech Stack: *Node.js, Express.js, BullMQ, Redis, MongoDB, Docker, Groq API*

- Built an asynchronous job processing system using BullMQ and Redis for resource-intensive AI tasks.
- Developed REST APIs to enqueue jobs and return job IDs without blocking client requests.
- Implemented background workers to process AI tasks and track job execution status.
- Integrated Groq API for AI summarization and MongoDB for persistent job tracking.

Track Your Job | AI-Powered Job Application Tracker

Tech Stack: *React.js, Node.js, Express.js, MongoDB, Groq API, Nodemailer*

- Built a MERN application to manage job applications, track statuses, and monitor application progress.
- Integrated Groq AI for resume-job description matching and personalized interview preparation.
- Implemented JWT authentication, bcrypt password hashing, and protected REST APIs.
- Automated onboarding emails, stale application reminders, and weekly reports using Nodemailer and cron jobs.

SKILLS

Languages: JavaScript (ES6+), Java
Frontend: React.js, HTML5, CSS3, Tailwind CSS, Axios, GSAP, Framer Motion
Backend: Node.js, Express.js, RESTful APIs, JWT & Cookie Authentication, bcrypt, BullMQ (Job Queues)
Databases: MongoDB, Redis, Qdrant
AI / LLM: RAG, LangChain, Groq, Gemini Embeddings
Tools & Platforms: Git, GitHub, Docker, Postman, Vercel, Render

EDUCATION

B.Tech in Computer Science Engineering **2023 – 2027**

Sagar Institute of Science and Technology

POSITION OF RESPONSIBILITY

Google Developer Groups (GDG) Organizer – Campus Lead, SISTec **2025 – 2026**

- Lead developer community initiatives, organize tech events, and drive student engagement in Google technologies.
