PROFESSIONAL SUMMARY

Backend-focused MERN Stack Developer with 1+ year of internship experience designing and building scalable REST APIs and server-side applications using Node.js, Express.js, and MongoDB. Skilled in JWT authentication, Redis caching, asynchronous job queues (BullMQ), RAG pipelines, and integrating LLM APIs into production-style applications. Strong foundation in API design, database operations, and backend workflow automation.

SKILLS

Languages: JavaScript (ES6+), Java
Backend: Node.js, Express.js, RESTful APIs, JWT and Cookie Authentication, bcrypt, BullMQ (Job Queues), Nodemailer, Cron Jobs, Background Workers
Databases: MongoDB, Redis, Qdrant (Vector Database)
AI / LLM: RAG (Retrieval-Augmented Generation), LangChain, Groq API, Gemini Embeddings, Semantic Search
Frontend: React.js, HTML5, CSS3, Tailwind CSS, Axios, GSAP, Framer Motion
Tools and Platforms: Git, GitHub, Docker, Postman, Vercel, Render

EXPERIENCE

Full Stack Developer Intern August 2025 – September 2026
HPS Lab Designs Pvt. Ltd.

- Designed, developed, and maintained RESTful APIs using Node.js and Express.js for a smart mobility CRM platform.
- Implemented backend workflows for device mapping, memberships, subscription management, and fuel tracking.
- Managed MongoDB operations including data modeling, queries, and updates to support core CRM functionality.
- Integrated backend services and business logic across modules to ensure reliable data flow between system components.
- Debugged and resolved API issues and enhanced existing backend functionality through iterative development.

Software Developer Intern February 2025 – July 2025
Cloud Pivot Technologies Pvt. Ltd.

- Integrated REST APIs using Axios to connect application components with backend services, handling request and response flows end to end.
- Implemented API response handling, loading states, and error handling to ensure reliable client-server communication.
- Managed application state and data flow across components consuming backend API data.
- Collaborated on debugging API integration issues and improved cross-browser and mobile compatibility.
- Built reusable, responsive components using React.js, Tailwind CSS, HTML5, and CSS3.

PROJECTS

SmartRAG – AI-Powered Document Intelligence and RAG Platform
Tech Stack: Node.js, Express.js, MongoDB, Redis, Qdrant, LangChain, Groq API, React.js

- Built a backend-driven RAG platform for PDF-based question answering using semantic search and LLMs.
- Implemented document processing, text chunking, Gemini embeddings, and vector search using Qdrant.
- Integrated Redis semantic caching to reduce redundant LLM calls for similar queries.
- Developed query routing with Auto, Documents, and General AI modes, and secured APIs with JWT authentication.

TaskForge – Distributed AI Job Queue System
Tech Stack: Node.js, Express.js, BullMQ, Redis, MongoDB, Docker, Groq API

- Built an asynchronous job processing system using BullMQ and Redis for resource-intensive AI tasks.
- Developed REST APIs to enqueue jobs and return job IDs without blocking client requests.
- Implemented background workers to process AI tasks and track job execution status.
- Integrated Groq API for AI summarization and MongoDB for persistent job tracking; containerized services with Docker.

Track Your Job – AI-Powered Job Application Tracker
Tech Stack: Node.js, Express.js, MongoDB, Groq API, Nodemailer, React.js

- Built a MERN application with protected REST APIs to manage job applications, track statuses, and monitor progress.
- Implemented JWT authentication and bcrypt password hashing to secure user data and API endpoints.
- Integrated Groq AI for resume-job description matching and personalized interview preparation.
- Automated onboarding emails, stale application reminders, and weekly reports using Nodemailer and cron jobs.

EDUCATION

Bachelor of Technology in Computer Science Engineering 2023 – 2027
Sagar Institute of Science and Technology

POSITION OF RESPONSIBILITY

Campus Organizer, Google Developer Groups (GDG) 2025 – 2026

- Lead developer community initiatives, organize tech events, and drive student engagement in Google technologies.
